

Internship Program

Sai Reddy

Summer/Fall 2019

Project Management Internship

Major: Environmental Engineering

“The only source of knowledge is experience”

-Albert Einstein

I am a graduate student at Purdue University, pursuing my Master's in Environmental Engineering. I am grateful to have the opportunity of interning at ACV Enviro during the Summer and Fall of 2019. During my time at ACV, I am able to get an insider experience of the environmental industry where I am exposed to various aspects like Air Monitoring, Hazardous Waste Management and other Project Management tasks. This internship has given me a broader perspective of the Environmental Industry and it was great to get practical experience, apart from what I learned at the University. The culture at ACV Enviro is wonderful and it provides a good environment to learn. I strongly recommend everyone interested in the environmental industry to get as much practical experience as possible. There is much more to learn and experience than what you see at the University.
